

Title: Optimizing Aircraft Sequencing & Spacing in Terminal Area

Name: Daniel Cumberland

Organization: NextGen Institute

Region: JPDO Washington, DC

Phone Number: 202-220-3357

E-Mail: Dan.ctr.Cumberland@faa.gov

Date: August 21, 2008

Archiving date: Sept. 30, 2008

Solicitation/Contract No: DTFAWA-05-A-0005 (Phase II)

Phase: Single Source (OTA Compliant Non-Competitive Procedures)

Procurement Method: Public Announcement

In compliance with procedures set forth in the NextGen Institute's Other Transaction Agreement (OTA), the purpose of this announcement is to inform industry of the basis for the NextGen Institute's decision to contract with Innovative Solutions International, Inc. (ISI) via single source (non-competitive) procedures.

The NextGen Institute intends to award a single source contract for Phase II of the Optimizing Aircraft Sequencing & Spacing in Terminal Area to Innovative Solutions International, Inc. (ISI).

Posting (brief abstract): ISI performed in an excellent manner in Phase I of this contract. ISI's ability to use the contacts created and commitments gained from various aircraft operators to cooperate in critical and valid data capture are essential for the success of Phase 2.

A competitive solicitation is not available for this procurement. If your firm does not agree with this single source determination, please provide evidence of your firm's capabilities and experience in providing the above service. The NextGen Institute will evaluate this

accordingly. All responses to this announcement must be directed to Daniel Cumberland not later than 12 noon, Eastern Daylight Time, 8 Sept. 2008. Responses may be sent via e-mail to Dan.ctr.Cumberland@faa.gov
